PROTOCOL ON SAFETY AND PREVENTION AGAINST COVID-19

The organizing committee of the 13th DYMAT International Conference has drawn up a protocol against Covid-19 with the aim of holding the event with safety guarantees for all participants. The protocol has been designed considering the safety and prevention rules detailed by the World Health Organization (WHO).

**Included with the conference pack, each participant will receive five FFP2 safety masks and two Covid-19 rapid antigen tests to be used as needed.**

The safety measures are listed below.

The use of face masks in indoor spaces is mandatory. It is also recommended outdoors if a social distance of 2 meters cannot be guaranteed. Each participant is going to find five FFP2 face masks in the welcome pack, but they must also bring their own face masks.

A social distancing of 2 meters should be met during the sessions. Pay attention to this criterion during the access control.

The regular use of hydroalcoholic gel dispensers, throughout the venue, is recommended, especially after contact with common objects or other participants.

During the presentations, common use devices such as microphones, computers, etc., will be cleaned regularly.

In case you think you may have Covid-19 symptoms, please use the antigen test provided, notify it to the organizers and leave the congress if you are attending on-site. Common symptoms are fever, dry cough, tiredness. Less common symptoms are aches and pain, sore throat, diarrhoea, conjunctivitis, headache, loss of taste or smell, a rash on skin, or discolouration of fingers or toes.

*Please, respect the protocol to hold the present event with safety guarantees*
